

# I. Trochoids

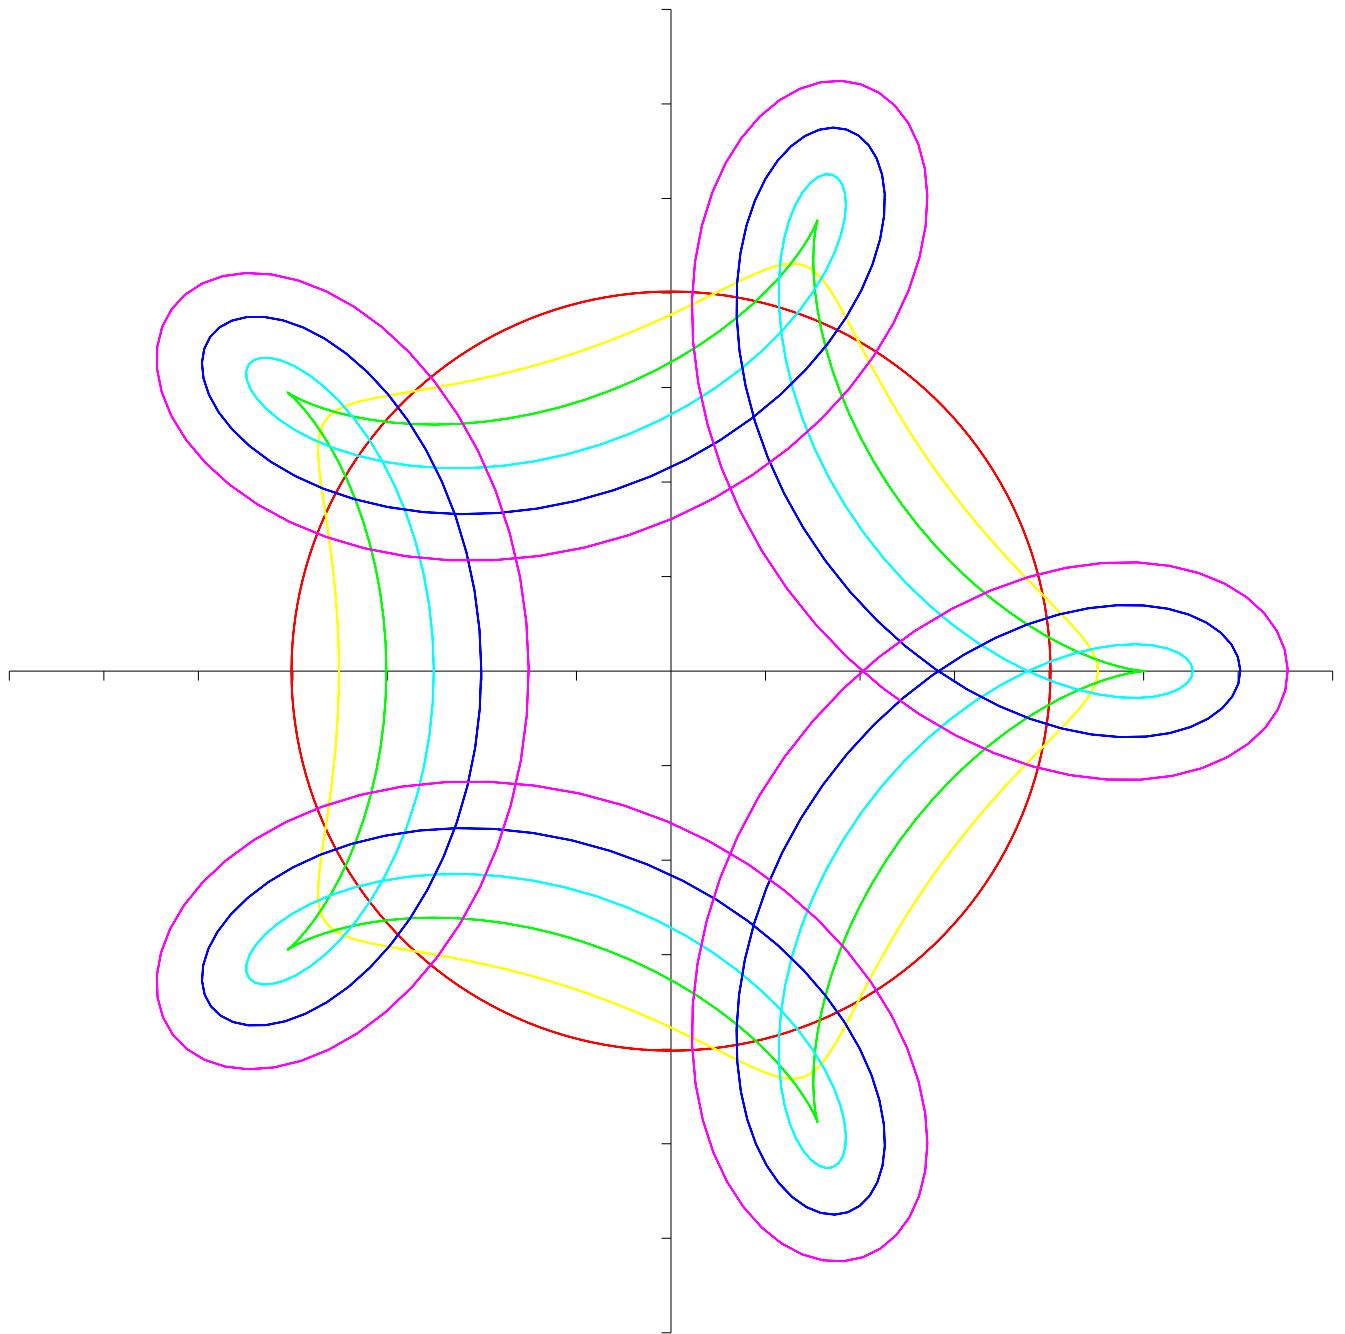

$$x(t) = a \cdot t - b \sin(t) \quad y(t) = a - b \cos(t)$$

## II. Epitrochooids

$$x(t) = a \cos(t) - b \cos(a/2 \cdot t) \quad y(t) = a \sin(t) - b \sin(a/2 \cdot t)$$

### III. Hypotrochoids

$$x(t) = a \cos(t) + b \cos(a/2 \cdot t) \quad y(t) = a \sin(t) - b \sin(a/2 \cdot t)$$
